

MAKE YOUR MARK

A FAST COST EFFECTIVE
SERVICE FROM
THE PUNCH MAKING EXPERTS

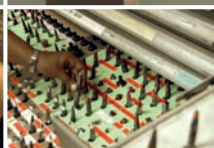

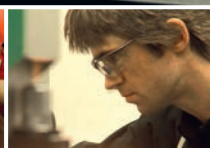

Assay Office Birmingham offers a fast and efficient punch manufacturing service using state of the art laser machines. Flat or curved punches on 'traditional straight' or 'swan neck' shanks are available. Just provide us with the artwork and we can do the rest.

The punches are cut by laser or CNC and finished by hand to an exceptional standard and are suitable for hand marking or marking by machine. Normal punches can be made in a range from 0.4mm to an upper limit of 6mm. In some cases where the design allows bigger punches can be produced.

IN HOUSE FACILITIES & ON SITE EXPERTISE

Having in house punch making facilities provides greater flexibility for clients as new high quality punches can be produced very rapidly. Should a punch become too worn or damaged it can be replaced immediately, preventing any unnecessary delays to the marking service.

Facilities include both a Punchroom and Toolroom making dies and jigs needed to support products whilst they are being marked. Highly qualified Laser Equipment, Mechanical Production, CNC Engineering, Welding, Jewellery Manufacturing and CAD personnel are always on site.

**BRANDING &
PERSONALISED
PUNCHES**

NOW ALSO AVAILABLE

LOGO punches for a variety of specific needs. Your logo can be created on a punch and applied to non precious metal, wood and even glass applications. Don't forget - Branding and Personalisation turns your product into a very special gift.....
